

Scattering at larger flying objects like airplanes ([Hogg et.al., 1983](#), [Strauch et.al., 1984](#), [Farley, 1985](#), [Hocking, 1997](#)) or birds ([Barth et.al., 1994](#), [Wilczak et.al., \(1995\)](#)) is also observed and can become very relevant at times in operational applications. This is especially true during the nightly migration of birds.
